

## Magnetic Bin Sign

Our magnetic bin signs are designed specifically for use on metal waste and recycling containers, delivering clear communication with a clean, professional appearance. Made from high-intensity .030 thermoplastic magnetic sheeting, each sign features a multi-pole magnetic arrangement that provides strong, reliable holding power on steel bin surfaces. The flexible construction allows the sign to lay flat against curved or flat panels, helping maintain a neat, easy-to-read presentation.

Built for everyday facility use, these magnetic signs perform well in adverse conditions and are easy to remove, reposition, or swap as waste streams change. Unlike adhesive labels, they leave no residue behind. Making them ideal for evolving recycling programs or temporary signage needs. Durable, and reusable, these magnetic signs offer a practical and professional signage solution.
