

Polystyrene Wall Sign

Our polystyrene wall signs are designed for clear, professional communication above waste and recycling stations. Produced from durable .080 high-impact polystyrene (HIPS), these signs provide a smooth, rigid display surface that keeps messaging highly visible in busy indoor environments.

Corona treated on both sides for optimal ink adhesion, this material delivers crisp, vibrant graphics. Lightweight yet impact resistant, polystyrene is well suited for long-term indoor signage where durability, and readability are essential.

Best selection, lowest prices.
