DIMENSIONS

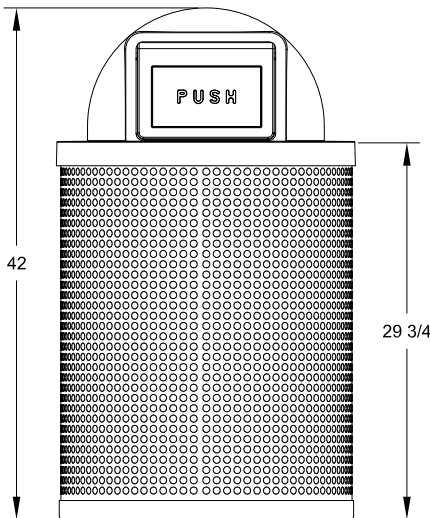

- 23" L x 23" W x 42" H w/lid

CAPACITY

- 36 Gallon

FEATURES

- Welded Steel Fabrication
- Durable thermo-plastic finish on receptacle
- **Includes - Color-matched plastic dome lid**
- **Includes - 36-gal plastic liner**
- **Includes - Security cable for lid**
- Trash receptacle is an all-welded construction, fabricated from a single piece of 14 ga. perforated steel with 9/16" dia. holes in a 13/16" center to center in-line pattern formed into a cylindrical shape.
- The receptacle is reinforced with 10 ga. top and bottom rings and dieformed cross braces across the bottom providing holes for anchoring options.
- All steel surfaces of the receptacle are covered with a thermo-plastic coating in choice of color. The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel.
- The thermo-plastic finish is impact resistant, prevents mold and mildew, and the textured matte surface is less susceptible to marring and scuffing.
- Includes color-matched molded plastic dome lid with self-closing, swing-action push door to keep waste out of sight and rain or snow out of the receptacle.
- Includes 36-gallon heavy-duty rigid plastic liner and cable tie-down kit to attach lid to receptacle frame.

36-gal plastic liner
